Dr. Anthony Macherone serves as a Senior Scientist with Agilent Technologies and a Visiting Professor at the Johns Hopkins School of Medicine. He is also on the faculty of P2i (Preconception 2 infancy) with a focus of providing "women and couples tools to improve their odds of healthy, full-term pregnancies, thus reducing the incidence of serious, chronic disorders among their children". Dr. Macherone is an expert in exposomics and is actively engaged in several publicly or privately funded exposomics investigations.
